Projects

Modern AI Hiring Platform *aiHiringPlatform*

- Built a full-stack real-time interview proctoring system as our Major Project, integrating computer vision and WebSocket-based monitoring.
- Tools Used: FastAPI, WebSocket, YOLOv8n, MediaPipe, PostgreSQL

Stock Prediction *stockPrediction*

- Developed a stock prediction site using LSTM and NEPSE data to analyze trends, forecast closing prices, and notify users via an integrated alert system.
- Tools Used: Python, TensorFlow, Keras, TypeScript, CSS

Dog Breed Identification *dogBreed*

- Developed a model using CNN while studying Deep Learning and Convolutional Neural Networks (CNN) to identify different dog breeds through transfer learning.
- Tools Used: Python, TensorFlow, Keras

E-commerce Website *clothingbrand*

- Developed an online store allowing customers to sign in/out, register, explore sections, browse clothing types, add to cart, and buy freely
- Tools Used: ReactJS, TypeScript, Redux, SCSS
